

Job Application

for

On the position of Software Developer

I have two years of experience in developing business software applications, I have acquired skills in all phases of business software application development including understanding what your client needs, creating surveys and feedbacks for software upgrades and digital marketing.

My goals are to share my knowledge on software development, learn new skills with my colleagues or work friends and create useful applications that will help businesses grow and dominate the business app market.

Hi! I'm Mark Gonzales your not so average techguy.

MARK GONZALES

SOFTWARE DEVELOPER

Aside from Software Development I also have experience and knowledge on facebook ads , graphic design and sales.

SKILLS

EXPERIENCE

SALES REPRESENTATIVE BPO COMPANY

(VXI Global Solutions, Incorporated)

Hobbies

Reading Books and Watching Videos

- Business and Financial Literacy Books
- Project Management
- Public speaking
- Self Development

I also enjoy watching **Two and a Half men** I recommend this to amazing people just like me , to watch this good stuff.

I may not look like it but this dude is learning how to play piano.

Projects

MLM ECOMMERCE

This is my very first project to work as a software developer in an organization, its amazing looking back when i started I know nothing about MVC but we managed built our very one MVC for this application.

The image shows two screenshots of the MLM Ecommerce system. On the left, the 'Breakthrough E-COM Login' page is displayed, featuring fields for 'Username' and 'Password', a 'Forget Password' link, and a purple 'LOGIN' button. On the right, a detailed binary tree structure is shown, illustrating the hierarchical structure of users and their relationships.

The image shows a screenshot of the MLM Ecommerce system's dashboard. It displays a user profile for 'KI20 KI20 STARTER' with details like First Name, middle Name, Last Name, and contact information. Below the profile, there is a 'Heir List' section and a 'Binary Summary' table showing earnings and payouts.

This system handles all business process of the company including inventory, payouts, commissions, tutorials marketing tools (facebook integration), it also boast a sms functionality, my colleague create our own sms client he handles hardware and i did the software side to connect it on the system.

The image shows a video player interface titled 'BreakThrough Video'. It displays a video thumbnail for 'UNLOADING your ID' presented by 'COACH Thony'. To the right of the video, there is a sidebar with various video tutorial links.

Projects

SSB Group of companies Portal

This is my favorite project , the founder of this company is an extra ordinary system analyst , without her guidance this system might not be accomplished as it is today.

This payroll system is previously an e-wallet system , but the owner decided that the software must be used by the company employees , so what we deed since the company does nt have payroll system , our colleauges decided that we conver this e-wallet to a workable payroll system that can be connected to our timekeeping system.

Like i said this timekeeping is extremely cool , because this can support thirdparty harwards like , **biometrics** **RFID** or anything you want except facial reg and others.

This time keeping is being used by different offices of the company and departments as well.
