

I have two years of experience in developing business software applications,
I have acquired skills in all phases of business software
application development including understanding
what your client needs, creating surveys and feedbacks for
software upgrades and digital marketing.

My goals are to share my knowledge on software development,
learn new skills with my colleagues or work friends
and create useful applications that will help
businesses grow and dominate the business app market.

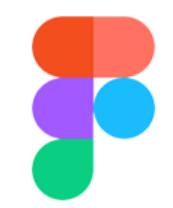

Hi! I'm Mark Gonzales your not so average techguy.

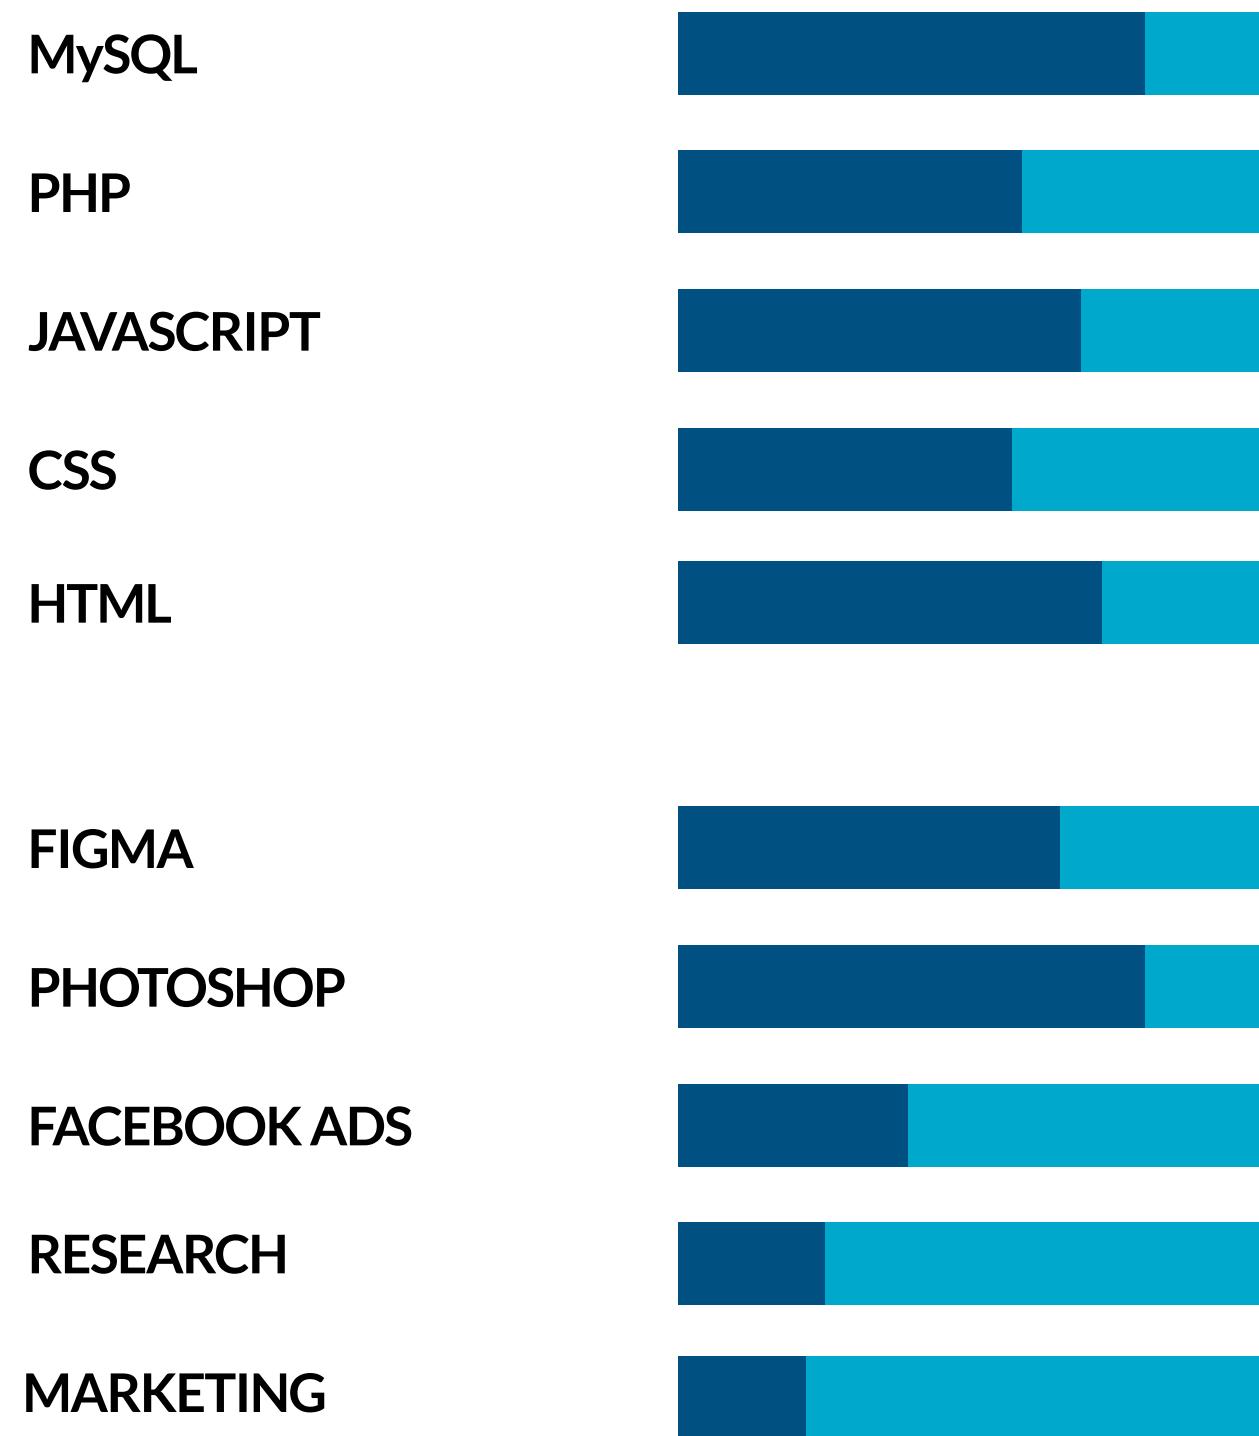

MARK GONZALES

SOFTWARE DEVELOPER

Aside from Software Development I also have experience and knowledge on facebook ads , graphic design and sales.

Projects

SSB Group of companies Portal

This is my favorite project , the founder of this company is an extra ordinary system analyst , without her guidance this system might not be accomplished as it is today.

Projects

MLM ECOMMERCE

This is my very first project to work as a software developer in an organization, its amazing looking back when i started I know nothing about MVC but we managed built our very one MVC for this application.

The image shows two screenshots of the MLM Ecommerce system. On the left, the 'Breakthrough E-COM Login' page is displayed, featuring fields for 'Username' and 'Password', a 'Forget Password' link, and a purple 'LOGIN' button. On the right, a detailed binary tree structure is shown, illustrating the hierarchical structure of users and their relationships.

The image shows a screenshot of the MLM Ecommerce system's dashboard. It displays a user profile for 'KI20 KI20 STARTER' with a photo, and sections for 'Heir List', 'Address', 'Username', 'Change Password', and 'Sponsor'. To the right, a financial summary is shown with values: Available Earnings 100.00, Total Payout 0.00, Recent Payout 0.00 (Date: no date), Binary Commission 100.00, Pair Today 0, 3rd Pair 0, and Overall Pair 1.

This system handles all business process of the company including inventory, payouts, commissions, tutorials marketing tools (facebook integration), it also boast a sms functionality, my colleague create our own sms client he handles hardware and i did the software side to connect it on the system.

The image shows a video player interface titled 'BreakThrough Video'. It displays a video thumbnail for 'UNLOADING your ID' presented by 'COACH Thony', along with a sidebar containing 'Tutorials' such as 'BreakThrough Video 2', 'BreakThrough Video 1', 'How To Get Your Facebook Link', 'How To Get Subscriber', and 'Tutorial How To Avail Your Cash Advance'.
